

Webinar on Need for Innovation in Renal Replacement Therapy (RRT) – 9th June 2020

The recommendations

Ray Vanholder

1. Research in EU should receive financial support conform burden of a disease and societal cost. Therefore CKD needs more financial EU support.
2. EU should support aggregated data collection on frequency, health care costs, and costs due to loss of productivity because of CKD.

Murray Sheldon

3. Expand the integration of diverse expertise.
4. Focus on obtaining more funding for product development with 2 recommendations for funding
 - By engaging patient organizations (e.g. cystic fibrosis or artificial pancreas examples) and
 - By seeking philanthropy for funding

Anna Prokupkova

5. Set your goals and formulate your political asks
6. Build a strong European Network
7. Take part in ongoing initiatives

Clemens van Blitterswijk

8. Select a grand source of inspiration
9. Go for an absolutely inspiring joined goal, while assuring that all participants also fulfill sub goals that are more important to them individually.
